## Object Storage

### Buckets in paribedavi1 (root) Compartment

Object Storage provides unlimited, high-performance, durable, and secure data storage. Data is uploaded as objects that are stored in buckets. [Learn more](#)

**1** You can use **10 GiB** of Object Storage and **10 GiB** of Archive Storage for free in your home region. You are using approximately **0 bytes** of combined Object Storage and Archive Storage. If you use more than **20 GiB** and have not upgraded when your Free Trial ends, your data is deleted. [Show details](#)

[Create Bucket](#)

Instances in recursosCompute Compartment

The Compute service helps you provision VMs and bare metal instances to meet your compute and application requirements. An [instance](#) is a compute host. Choose between virtual machines (VMs) and bare metal instances. The image that you use to launch an instance determines its operating system and other software.
